

EYEDELINE™ marine ingredient

 Schedule

eyedeline™
marine ingredient

An impressive look in one touch

A complete care of eye contour that combats the three signs of tiredness and aging typical of this delicate skin area: dark circles, eyebags and wrinkles

Mechanism of action

Biotechnologically-obtained, it reduces fluid extravasation while increases the degradation of bilirubin, promotes collagen I and elastin production and inhibits the formation of advanced glycation end products.

Cosmetic Benefits

After 14 days of treatment the reduction of eyebags volume was notable, reaching value of -8.2% at the end of the treatment (28 days, 4%) leading to a younger looking skin.

**Halal-certified active ingredient*
